The layout of the screen illustrations in this guide may differ depending on your system configuration and settings.

Operational Overview

Icon (home/displays), power switch operations

TZT16X/22X/24X

[FURUNO] icon
Displays the home page.

Display icons
(max. 16 on Home page)

"eGuide" provides an abbreviated operator's guide.

Home page

Power off

Device: Powers off this unit.
Network: Powers off all NavNet TZtouch series units in network.

Power switch

- Turns on power.
- Shows [Quick Access] window.

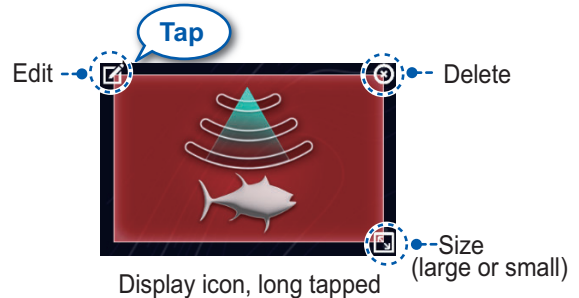

Brilliance, Hue

Hue: [Color selection icons]
Brilliance: [Slider icon]

How to edit a display icon

Long-tap a display icon to resize, delete or change its contents, then tap to confirm. You can also rearrange the icons by long-tapping and dragging.

How to select a display

- Tap a display icon on the Home page (see illustration above).
- Tap a display icon on the Quick page.

Swipe downward from top of display

Quick page

Touchscreen operations

Tap

- Select an item on a menu.
- Tap the display or an object to show the corresponding Pop-up menu.

Drag, swipe

- Move the chart.
- Scroll the menu.
- Show Slide-out menu, Layers menu.

Pinch

Zoom in

Zoom out

- Zoom in, zoom out the chart plotter and weather displays.
- Change the range on the radar and fish finder displays.

Range buttons

Two finger (long) tap

Does the function assigned to [Two Finger (Long) Tap Function] in the [Settings] - [General] - [This Display] menu.

Two finger drag

Change the viewpoint position on the 3D display.

Menu operation

Pop-up menu

Tap screen (applicable point, object, etc.).

Tap the required function. (">" indicates additional options.)

Layers menu

Swipe upward from the bottom edge.

Layers menu

Tap
Tap the required function.
(To switch between menus, swipe or tap applicable tab.)

Slide-out menu

Swipe leftward from the right edge.

Tap the required function.

Icon color and function state
Yellow: ON, White: OFF

Settings menu

Tap the [FURUNO] icon.

Tap [Settings].

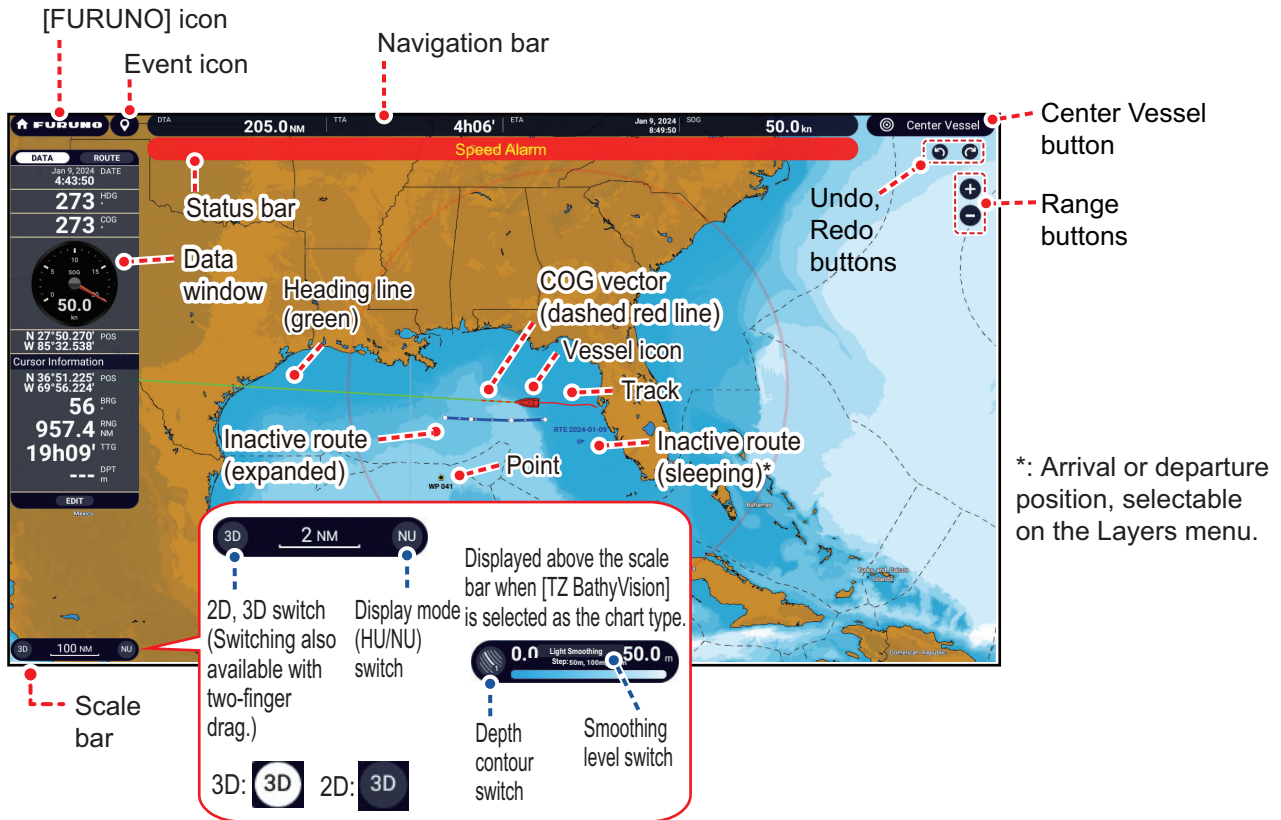

Drag to find required menu, then tap item.

Tap the required menu item.

Chart Plotter

Data Window

Swipe from the left edge of the screen rightward to show the Data window, which shows nav data at the left edge of the screen. To hide the window, swipe the box leftward or tap the [NavData] indication (yellow) in the Slide-out menu.

Data window settings

Tap [Edit] to show [Edit NavData] display.

To add nav data:

① Tap [+Add NavData]. ② Tap the data to add.

To remove a data box, or change the displayed data:

① Tap the nav data to remove or change. ② Remove nav data: Tap [Remove]. Change data: Tap data to display.

Tap [Change Type] to change the data display method, among Graphic (analog), Numeric (digital), and Graph.

Tap [Close] to finish.

Grip icon
Drag the grip icon to move the nav data.

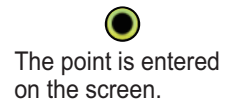

Points/Boundaries

Points can be entered on the chart plotter display (radar, fish finder and weather displays also) to mark important locations such as a good fishing spot. Point attributes (position, symbol type, color, etc.) are recorded to the Points list. Also, boundaries can be set at the position desired (net position, area to avoid, etc.).

How to enter a point

Tap where to enter a point.

The point is entered on the screen.

How to set a point as destination

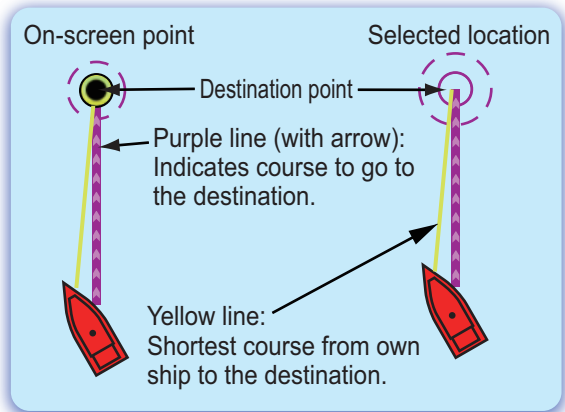

On-screen point

Tap a point or the location to set as destination.

If a point was tapped.

Points list

Sort the list by date, name, icon, color, range.

Tap the point to set as the destination.

Notice

Note: [Find on Chart] puts the selected point at the screen center.

How to set a boundary

Tap the place where to set a boundary.

Tap the shape to use for the boundary.

[Area]/[Line]: Tap necessary points to complete the boundary, referring to "Route" on the next page.

[Circle]: Drag icons to adjust the size and position, and then tap [End Boundary].

Routes

A route is comprised of a series of waypoints leading to a destination. Routes are saved to the Routes list.

How to create a new route

Tap the first point for the route.

Select [Manual] or [AI Routing]*. Then tap the next point for the route. Repeat this operation to complete the route.
 *: For [AI Routing], if you tap two points, the start point and the final point, the system automatically creates a route that it deems navigable.

Enter a name for the route, then tap [✓].

How to follow a route

On-screen route

Tap a leg of the route.

Routes list

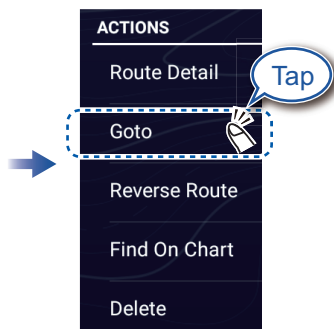

Home page

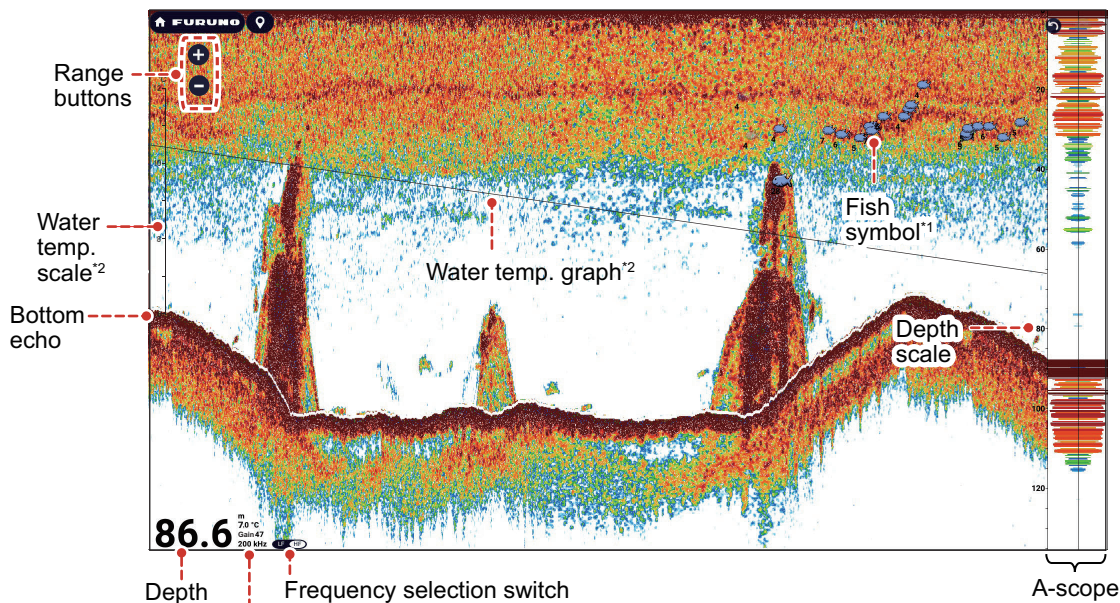

Route sort options

Tap the route to navigate.

Fish Finder

From top: *1: Requires ACCU-FISH™ compatible transducer on the network.
 Unit, Temp. *2: Requires water temperature sensor.
 Gain, Freq.

Note: Names of menu items may be different depending on the transducer connected on the network.

How to select a frequency

- Low frequency: For “normal” use.
- High (Middle) frequency: For detailed observation of schools of fish.
- Dual frequency: Show both the low and high frequency pictures.

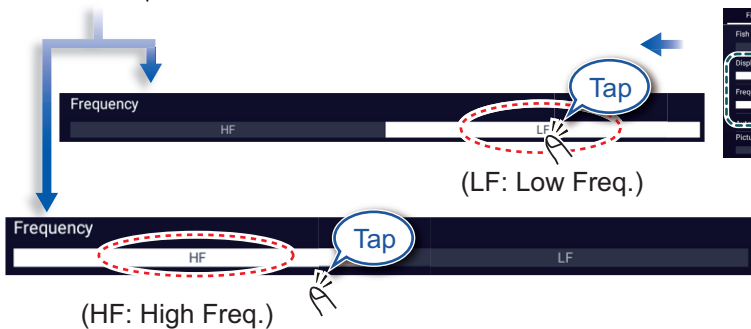

Single Freq.

Dual Freq.

Open the Layers menu;
tap the [Fish Finder] tab.

Note
[TX/STBY] toggles between TX and standby.

How to show past echoes (echo history)

Swipe leftward or rightward
to show past echoes.

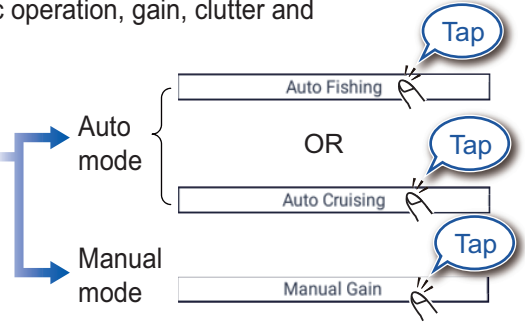

Return to normal display.

How to select the operating mode

The fish finder is available in automatic and manual operation. For automatic operation, gain, clutter and TVG are automatically adjusted.

Open the Layers menu, tap the [Fish Finder] tab.

Manual mode

How to change the range

Open the Layers menu, tap the [Fish Finder] tab.

How to adjust the gain

Open the Layers menu, tap the [Fish Finder] tab.

How to reduce clutter

Open the Layers menu, tap the [Fish Finder] tab.

The larger the value, the more the clutter is reduced.

Zoom display

- Bot. Lock**
Bottom Lock
 Search for bottom fish.
- Bot. Zoom**
Bottom Zoom
 Find bottom contour and hardness.
- Mark. Zoom**
Marker Zoom
 Help determine the size of a school of fish in the middle layer.

- Short tail indicates soft bottom.
 - Long tail indicates hard bottom.

ACCU-FISH™/Bottom Discrimination

ACCU-FISH™

Detected fish can be marked with a fish symbol. (Requires ACCU-FISH™ capable transducer on the network.)

ACCU-FISH

ON

Fish symbol

Fish size or depth

12

Notice

You can select fish symbol type, and fish size or depth indication from the menu - Home page → [Settings] → [Fish Finder] → [ACCU-FISH].

Bottom Discrimination

Show probable bottom hardness. (Requires bottom discrimination capable transducer on the network.)

Bottom Discrimination

ON

Bottom discrimination display

Rock

Gravel

Sand

Mud

The most probable bottom material.

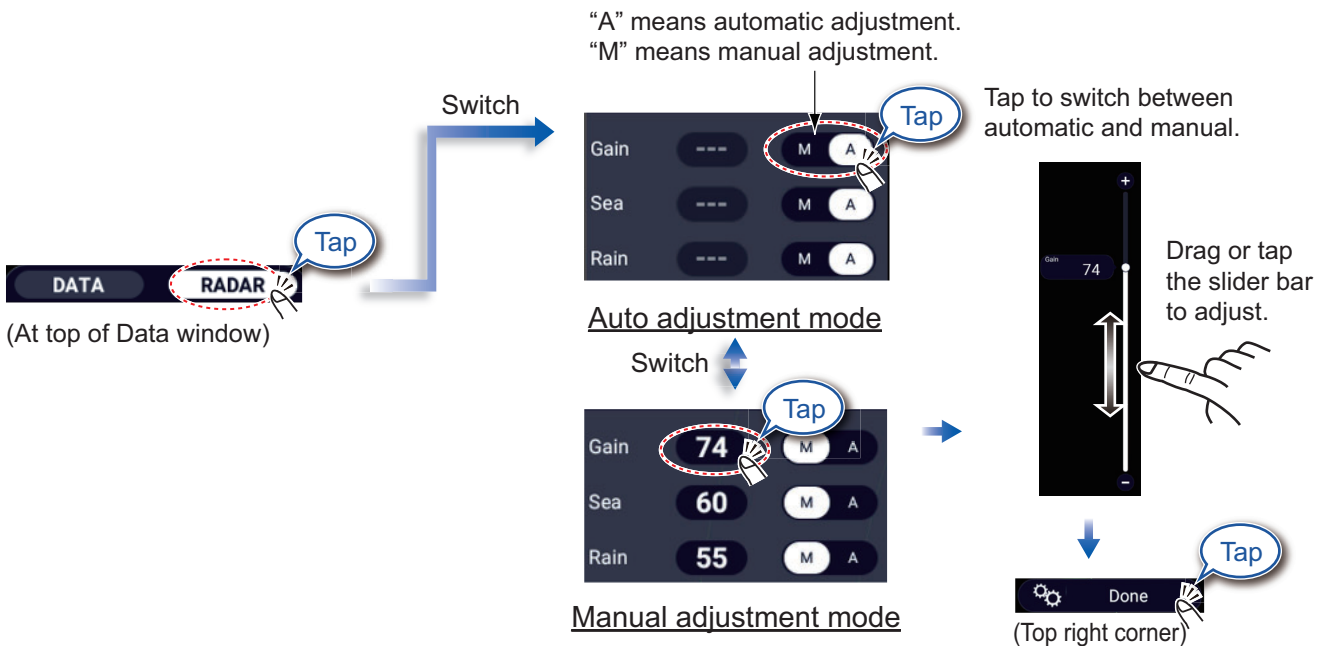

Note: ACCU-FISH™ and Bottom Discrimination should not be selected to "ON" at the same time.

How to switch between standby and TX

How to adjust the gain / sea clutter / rain clutter

How to measure the range, bearing from own ship to an object

Tap an object to show its range and bearing from own ship.

How to set a guard zone

A guard zone alerts you (with aural and visual alarms) when an object (ship, island, reef, etc.) enters the area you specify.

Open the Layers menu, tap the [Overlays] tab.

The guard zone appears in dashed lines.

Tap dashed line on guard zone.

An icon appears at each corner of the guard zone.

Drag the icons to set guard zone.

(Top right corner)

Tap the guard zone again.

The dashed lines change to solid lines, indicating the guard zone is active.

ARPA Operation

ARPA is an anti-collision aid that tracks the movement of other ships to help prevent collision. ARPA not only tracks other ships but also provides their navigation data. Targets can be acquired manually, automatically, or both automatically and manually.

How to show, hide ARPA symbols

Open the Layers menu, tap the [Overlays] tab.

ARPA Targets

ARPA symbols ON

ARPA Targets

ARPA symbols OFF

How to manually acquire a target

Tap the target to acquire.

Acquire

How to automatically acquire a target

Set a guard zone, then tap the guard zone.

Auto Acquire

The dashed lines change to solid lines, indicating the guard zone is active.

ARPA symbols

At acquisition

30 seconds after acquisition

Lost target

How to display target data

ARPA symbol

Tap an ARPA target to show its data.

ID	68
COG	206.9 °
SOG	5.8 kn
Range	1.432 NM
Bearing	262.9 °
CPA	466 m
TCPA	-6'13s

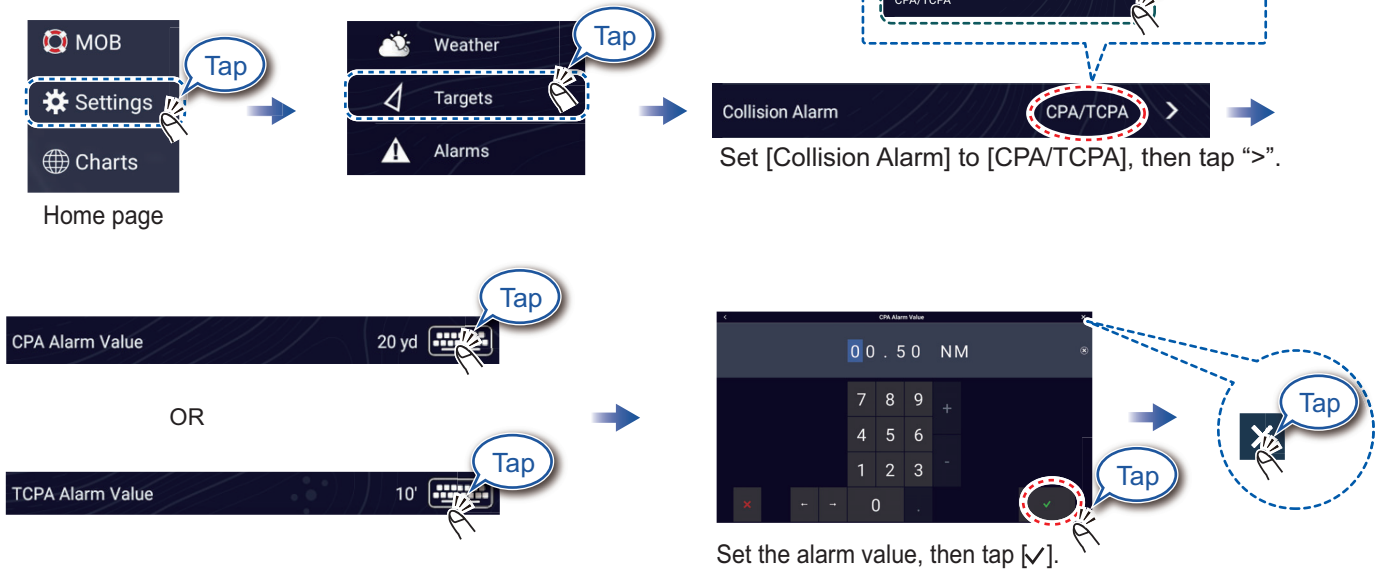

CPA/TCPA alarm

The CPA/TCPA alarm releases an aural alarm and a visual alarm (message in Status bar) when both the CPA and TCPA of a tracked target are equal to or lower than the CPA/TCPA alarm setting.

CPA: Closest point of approach

TCPA: Time to closest point of approach

How to set the CPA/TCPA alarm

How to acknowledge the CPA/TCPA alarm

Tap the alarm message (top of screen) to acknowledge the alarm and stop the aural alarm.

CPA Line

The CPA Line feature gives you a visual line that depicts the closest point of approach to a selected ARPA target. To use this feature, own ship position and heading data are required.

How to enable the CPA Line feature

How to show the CPA Line

Tap an ARPA target (condition: target's CPA/TCPA must be a positive value) on the radar or chart plotter display.

AIS (Automatic Identification System)

How to show or hide AIS target symbols

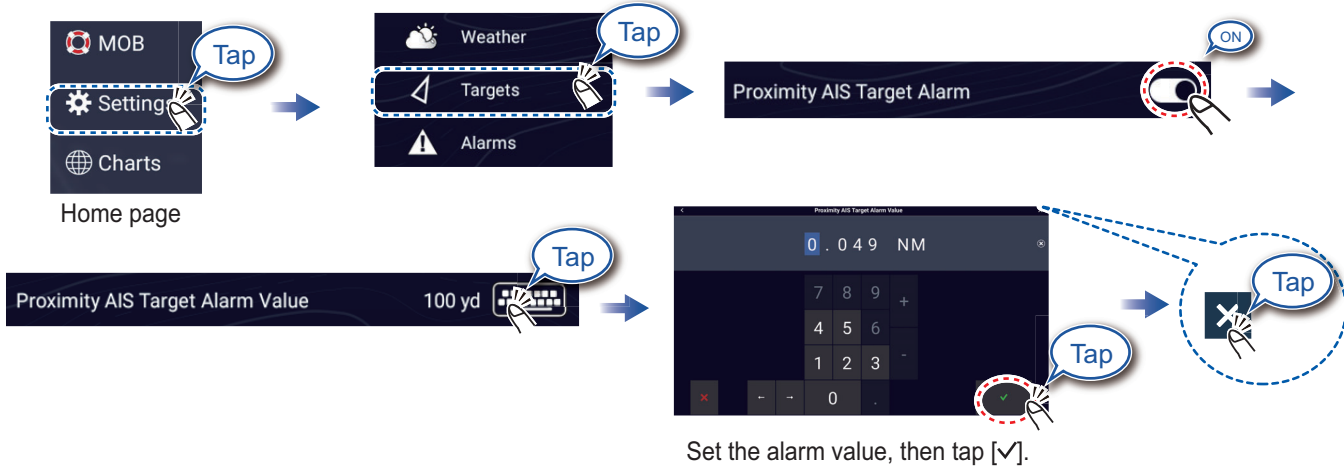

AIS target symbols

	Class A AIS	Class B AIS	BFT* AIS
Activated target	SOG and COG vector Color: Blue	SOG and COG vector Color: Green	SOG and COG vector Color: Blue (filled)
Dangerous target	Color: Red		
Lost target	Color - AIS target: Blue - Cross: Red	Color - AIS target: Green - Cross: Red	Color - AIS target: Blue (filled) - Cross: Red

*: Blue Force Tracking

Proximity AIS target alarm

The proximity AIS target alarm releases aural and visual alarms when the distance between own ship and an AIS target is near the alarm value.

How to show AIS target data

Name	FÜRÜNÖ NAVNET
MMSI	368007000
COG	210.9 °
SOG	5.7 kn
Range	2,244 NM
Bearing	214.3 °
CPA	1,866 NM
TCPA	-3d13h
Last Update	0'22s

Instrument Display

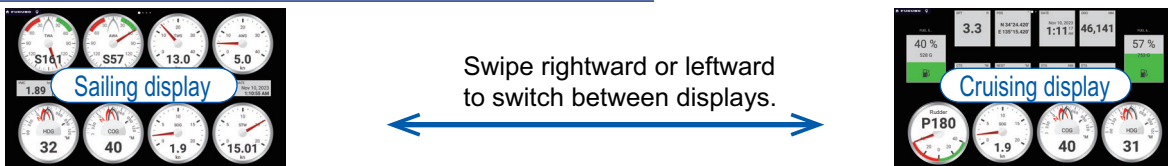

With connection of appropriate sensors, the instrument display shows various navigation data.

How to enable the instrument display

Add the instrument display icon to the home page to show the instrument display.

How to switch instrument displays (ex. full display)

How to edit the instrument display

Tap the instrument display, then select [Edit Page] on the Pop-up menu.

Edit mode

A white line surrounds each indication.

In the edit mode, you can remove, change, add, rearrange indications.

To end the edit mode

Tap the screen, then select [End Edit] on the Pop-up menu.

How to remove or change an indication

In the edit mode, select the indication to remove or change.

- Remove indication: Tap [Remove].
 - Change size: Tap [Small], [Medium], [Large], [Double Extra Large]*.
 - Change type: Tap [Change Type], then tap desired size.
 - Change indication: Tap indication in [NAVIGATION DATA], [ROUTE INFORMATION], [WIND AND WEATHER], and [ENGINE].
- *: Numeric displays only

How to add an indication

In the edit mode, tap a location not occupied by an instrument display.

Select a size in desired category.

Tap added instrument display to change displayed data (see above).

Wireless LAN Settings

You can connect to the internet with the wireless LAN signal to download weather information, update the software, and connect to an iPhone, iPod, iPad, or Android™ device, to operate and monitor a NavNet TZtouch XL device.

How to connect to an existing LAN

Connect to the existing LAN to download weather data or update the software. For smartphone and tablet settings, refer to appropriate manuals.

Home page

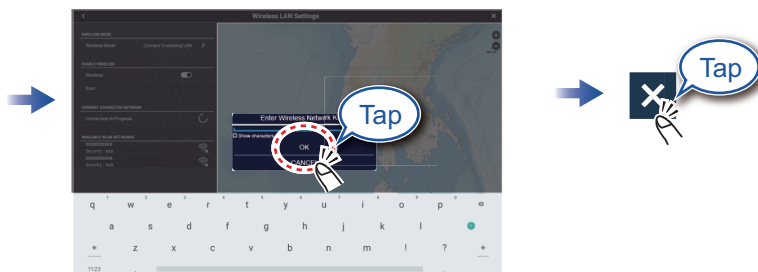

Tap [Connect to existing LAN].

Note: If no network appears, tap [Scan].

Tap network required.

Enter the password, then tap [OK].

How to create a local wireless network

Create a local wireless network to enable operation, monitoring of the TZTtouch XL from a smartphone or tablet.
