

TZtouch3 Transducer Pigtail Cable

TZ3-12P-PGT

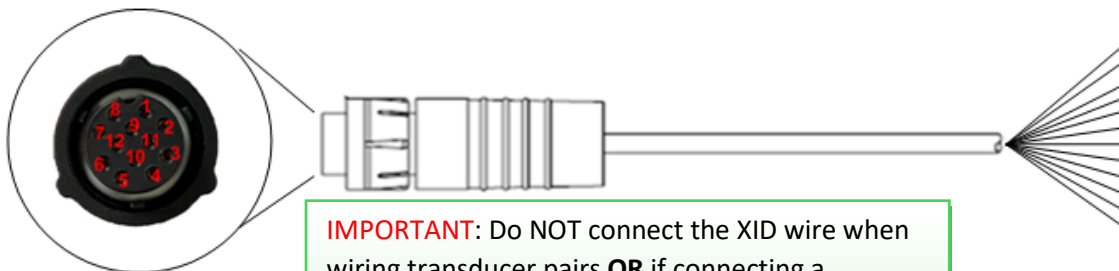

IMPORTANT: Wiring is generally color for color if wiring to TZT3. (Always verify wiring diagrams and always disconnect or connect transducer with fish finder unit powered OFF)

TZTXL and DFF1-UHD+ wiring is somewhat different. When wiring dual frequency, the wiring is the same as TZT3. (normally color for color) Wiring for single frequency CHIRP or Dimplexed CW, the XL/UHD1 uses pair group 1 (pin 6&7) (not color for color).

(noting that TZT3 uses Group2 (pin 2&3))

Pin	Description	Color Code
1	Not Connected	N/C
2	HF Transducer (+)	Blue (Group 2*)
3	HF Transducer (-)	Black (Group 2*)
4	Ground Overall Shield	Outer Bare
5	TEMP	White
6	LF Transducer (+)	Blue/White (Group 1*)
7	LF Transducer (-)	Black /White (Group 1*)
8	Not Connected	N/C
9	XID	Orange
10	XID/TEMP (Ground)	Brown
11	HF Transducer Shield	Inner Bare (Group 2*)
12	LF Transducer Shield	Inner Bare (Group 1*)

*Note- Each "Group" is bundled and seperated individually with blue foil

IMPORTANT: Do NOT connect the XID wire when wiring transducer pairs **OR** if connecting a transducer which isn't in the software selection list of the MFD.
