Upgrade Your Vessel And Enhance Your Boating Experience With Furuno's High-Resolution FIP-460 Camera For TZtouchXL

Camas, WA - Furuno recently introduced their FIP-460 marine camera for NavNet TZtouchXL, making it simple to add high-quality video to your MFD. With an impressive resolution of up to 3MP (2304 x 1296), the FIP-460 camera ensures crystal-clear imagery, capturing every detail with remarkable clarity. The mechanical IR cutout filter enables true day and night operation, providing consistent performance around the clock.

Installation is a breeze thanks to the fully rotatable inner camera ball and various flexible mounting options.

Seamlessly integrate this camera with TZtouchXL MFDs, TimeZero software v4.1 and above, and other ONVIF-compliant devices. Whether you're enhancing security or capturing the thrill of the catch, this rugged marine video camera is your go-to solution for unparalleled performance and versatility on the water.

The FIP-460's small, compact housing and wide operating temperature range make it suitable for multiple applications, such as onboard security, sport fishing, engine room monitoring, and overall vessel surveillance. The camera's flexible power options include direct 12 VDC, PoE injector, or PoE HUB, adhering to the IEEE802.3af Power over Ethernet (PoE) standard. Its IP66 water ingress protection guarantees durability and reliability in the harshest marine environments.
