FI70 Software
Update Procedure
Using TZT2 or TZT3
Preperation for FI70 Software update

1. USB memory (Do not use SD to USB Adapter)

2. Download FI70 Software for the TZT2/3 from the Furuno USA website under the "Software" selection of the FI70 product page.

3. Unzip FI70 Software

4. Move unzipped software contents to root of USB memory. Root of USB memory will contain the following only:

(Note: When you open your USB memory window, you should see only the files shown above. They should not be changed or placed inside any additional folders. Other software, photos, or files should NOT be on the USB along with this upgrade software)

5. With the power off to the MFD. Insert USB memory into the USB pigtail cable located on the back of the TZT2/3 MFD. This will be a white pigtail cable. Power on the TZT2/3 MFD and boot up normally.

# You are now ready to begin the FI70 software update

**1.** Press **Home** Button
**2**. Press **Settings**

3. Press **Initial Setup**

4. Press **Update Network Equipment**
